REQUEST FOR PROPOSAL
EMAIL QUESTIONS

December 22nd, 2023

For

INTEGRATED LIBRARY SYSTEM FOR
SCHAUMBURG TOWNSHIP DISTRICT LIBRARY
RFP #2023-ILS-CP01

Questions and answers for emails collected by December 22nd, 2023.

1. Please provide a list of third-party products that are required to be integrated with the ILS.

    Current third-party products/vendors that are used:

    Envisionware Self-Checks via SIP2, D-tech International Lockers via SIP2, Illion Phone/SMS notifications, UNIQUE Collections, OCLC EZProxy, INGRAM, B&T, BRODART, CENGAGE, Midwest Tapes

2. Do we require other languages in addition to English in the Discovery solution?

    Would prefer to have multiple languages as we support these collections: Chinese, Gujarati, Hindi, Japanese, Korean, Polish, Russian, Spanish, Ukrainian, and Urdu materials

3. Do you currently have authority linking in our bibliographic records? If yes, do you want that information migrated?

    We currently have authority linking in our bibliographic records. It would be beneficial to have them moved, but we could do an update with a vendor as needed. Our subject/genre authorities are more important to us than name authorities, but we would like them to all be migrated.

4. Can you elaborate on what your goals are with discovery being natively based on BIBFRAME?

    Our goal is to continue to expand access. We would be open to alternative options, but if we could give patrons options for finding materials close to them without having to visit the library catalog it would be beneficial to the Library.

5. Are you open to working with a third-party product that integrates with Discovery for Event Management?

    We would be open to working with an integrated third-party product for Event Management.

6. Are you open to working with third-party products that integrate with your ILS for Marketing Solutions?

    We would be open to working with an integrated third-party product for Marketing Solutions.
